### Evacuation

When the fire warning system has been activated;

- Leave the building immediately by means of the nearest stairwell or exit.
- Close the door to your area as you leave. Do not block doors in the open position.
- Once outside the building, proceed to the nearest designated assembly area.
- Do not attempt to use the elevator. During an alarm normal elevator operation will be disabled. If you are a passenger on the elevator and an alarm is activated, the
- Elevator will return to the first floor and both end doors will automatically open.
- During evacuation do not delay for any reason; do not stop to fight the fire. Smoke inhalation and invisible toxic fumes can injure or kill as easily as fire.
- The primary life-saving factors are; keep calm, do not panic, and do not run.
